

Cross-Chain Farming DeFi 3.0

Litepaper and Roadmap 2.0

06 December 2021

Trust & Transparency - Secure DeFi 3.0 For All

These are the core principles which we abide by at Cross Chain Farming.

We want to help improve the lives of every single one of our holders and ensure they never have to worry about how safe their funds are.

Gone are the days of having to worry about bad-actor developers and teams trying to enrich themselves by rugging their token holders.

Your funds are SAFU!

DeFi 3.0 - How We Do It

Cross Chain Farming is the first fully audited, deflationary cross-chain Farming as a Service (FaaS) DAO on Binance Smart Chain. Our aim is to optimize the power of farming across all chains, offering simple and low fee access to DeFi 3.0 for everyone.

We farm for you whilst using reflections and buy-backs to benefit holders, creating sustainable long term price action.

In addition, we are the first FaaS DAO to offer additional services including decentralized token launch, listings as well as on-chain and off-chain security audits. Funds from all these services will also be used for buy-backs, farming, and marketing to support the native CCF token.

What Is DeFi Yield Farming?

In simple terms, DeFi yield farming is a strategy of utilizing your crypto assets to generate more crypto.

It involves locking or lending your assets via smart contracts. For example, by staking your tokens to help with the governance of a decentralized ecosystem, or providing liquidity to trading pairs on decentralized exchanges. In return you receive yields, usually in the form of fees. Sounds simple right?

However, today yield farming has become multifaceted. It requires complex strategies, moving funds around to secure the best returns and has become dominated by whale investors. In addition, transaction fees and the risk of scams make it prohibitive for many to get involved and benefit from these returns.

Understanding DeFi 3.0

DeFi 3.0 democratizes yield farming so that everyone can benefit in a quick, easy and secure way.

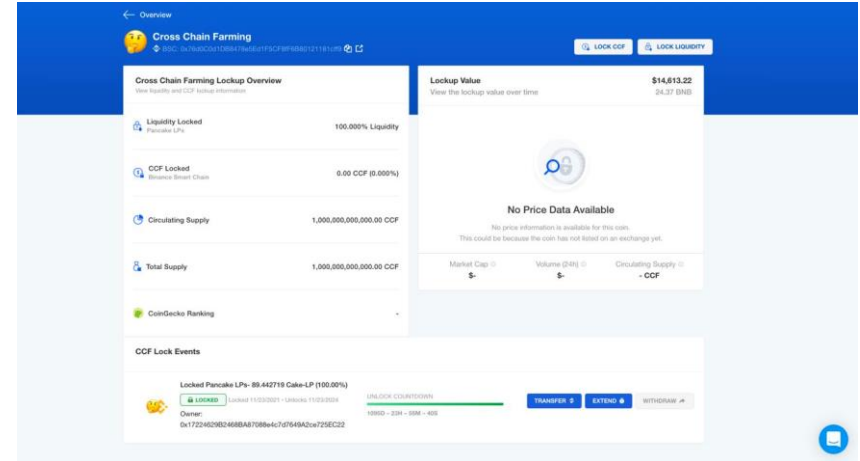

1. Every buy and sell transaction will be liable to a 12% tax (detailed on pages 7 and 8)
2. This incentivizes and rewards long term holders
3. We farm, and use profits from the farming wallet to support token liquidity and price action
4. We build a spot portfolio, and airdrop profits to staked holders in BNB
5. We use the marketing wallet to grow our community and the presence of \$CCF

By investing in the \$CCF Ecosystem, we do the hard work for you. All you have to do is sit back and watch your rewards grow.

Why Trust Us?

- **Fair launch:** *No private or public sales, no VCs, no team tokens.*
Everyone has an equal chance in a fair market.
- **Locked liquidity:** 100% of liquidity tokens are locked until 2025 making the project “un-ruggable”.
- **Low fees:** launched on Binance Smart Chain (BSC) for low fees so that everyone can join.

Tokenomics

Maximum token supply - 2,000,000,000,000 (two trillion).

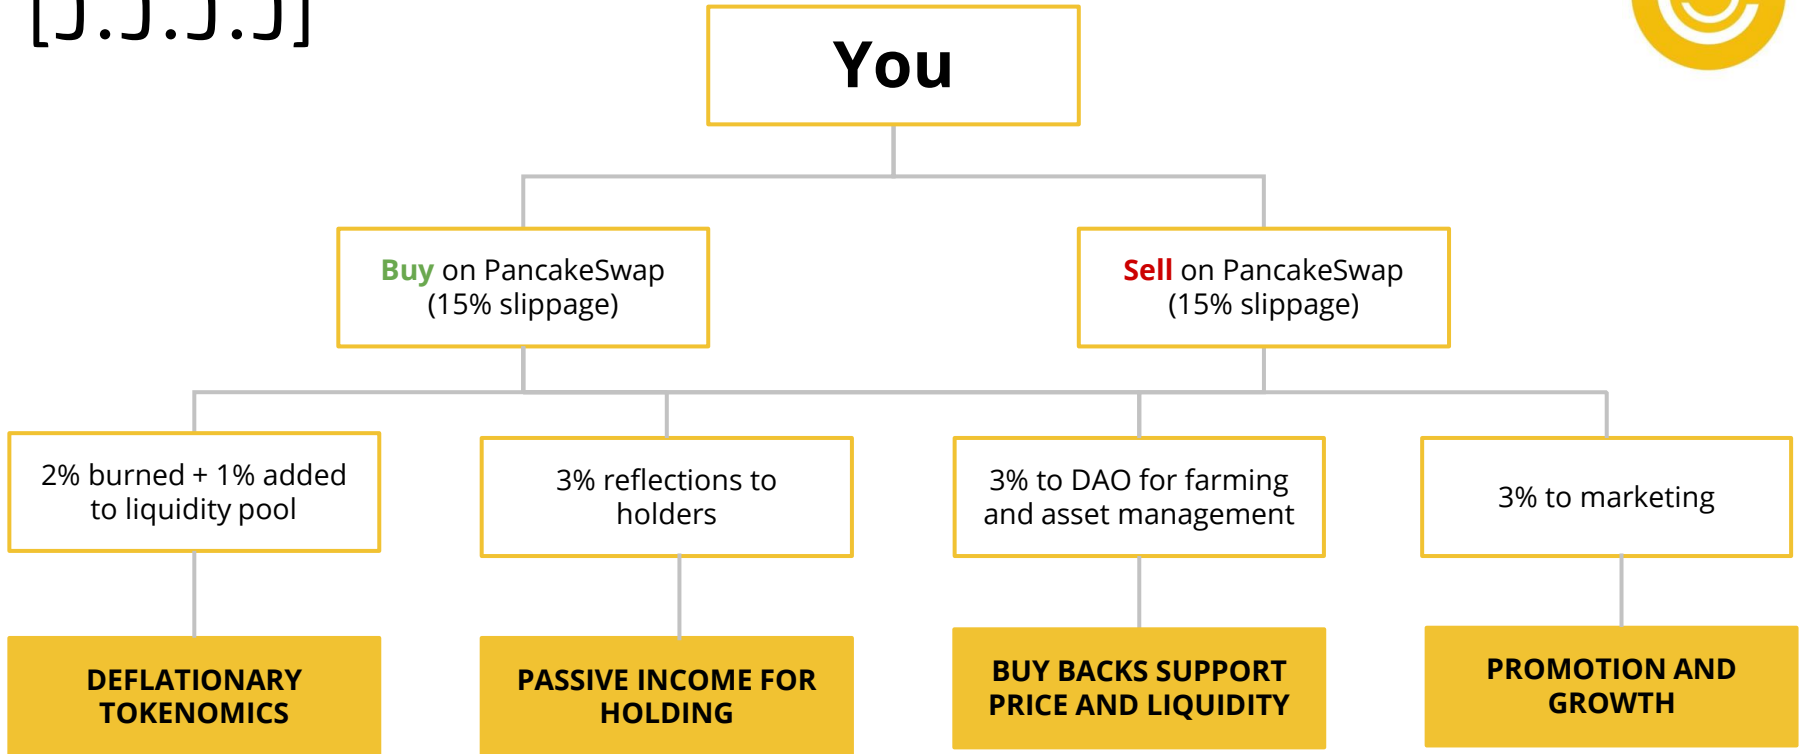

Circa 300,000,000,000 were immediately sent to a burn wallet.

All remaining tokens are in circulation.

There is a 12% tax on BOTH Buys and Sells which will be distributed as follows:

- 2% is burned and 1% is added back to liquidity
- 3% is reflected to holders
- 3% goes to farming (DAO)
- 3% to marketing

[3.3.3.3]

The Cross Chain Farming Ecosystem

Unlike other emerging DeFi 3.0 tokens, we are building an entire DeFi 3.0 ecosystem.

We go beyond FaaS with additional real-world utility for an entire cross-chain ecosystem for all:

\$CCF token	Farming and Staking	CCF asset management	Portfolio building
Seed investing and staking launchpad	DApp building	Auditing/Tokenomics on chain analysis	Mobile app safety

Roadmap

Q4 2021

- Fair launch 
- Build team 
- Build community 
- CMC and CG listing 
- Roadmap 1.0 
- Litepaper 1.0 
- Farming and staking 
- Asset management 
- Dashboard launch 
- AMA and marketing 
- 5,000 holders

Q1 2022

- Marketing
- 10,000 holders
- Dapp proposal
- Website rebrand
- Seed investing plans
- Partnerships
- Farming expansion
- CEX listing (community vote)
- Portfolio building strategy
- Whitepaper release
- Roadmap update

Q2 2022

- Audit/tokenomics service
- Further team building
- More CEX listings
- Increased marketing
- Dapp development
- Safety mobile app proposal
- Community building
- 15,000 holders

Q3 2022

- More CEX listings
- More marketing
- Dapp development
- New investment options
- Community building
- 20,000 to 30,000 holders
- And a lot, lot more

Our Team

CTO: Rago	COO & CIO: Shunsui	CMO: Alex
<p>Mobile and blockchain dev, part-time YouTuber, trader, farmer and on-chain analyst.</p> <p>Twitter, YouTube</p>	<p>TradFi turned Crypto enthusiast, Investor, Farmer, Fundamental and Technical analyst.</p> <p>Twitter</p>	<p>Media and tech entrepreneur with multiple exits, scale up and marketing pro.</p> <p>Twitter</p>
